

WHAT'S THE gOSHC?

Inventors Workshop! MTOP Outcomes: 2.2, 2.3, 4.1, 4.2, 4.3 **Week 7, Term 2**

Paper Plane Making!

We often see paper planes soaring through the air at OSHC, but mastering the art of the perfect paper plane is easier said than done! This week, our OSHCies took on the challenge of following tutorials, sharing tips, and helping one another create planes that could fly further than ever before. While some of the folds became so complicated that even the educators were close to giving up, everyone showed impressive perseverance and determination.!

Playdough Making!

Arguably the most popular activity of the week was playdough making! From getting hands-on with the ingredients to choosing colours, adding sparkles, and experimenting with different textures, the fun seemed endless. Once the playdough was ready, our OSHCies let their imaginations run wild, creating shapes, creatures, and all sorts of colourful masterpieces!

Create your Own Sport!

Create Your Own Sport was another big hit this week! With no shortage of talented athletes and creative thinkers at OSHC, it was no surprise to see so many fantastic ideas come to life. Despite the rainy weather and the challenge of staying off the muddy grass, or sometimes missing out on outdoor space altogether, our students adapted their games brilliantly. The result was a collection of unique, imaginative, and entertaining sports that proved a little creativity can turn any space into a playing field.

LEGO Tournament!

Our final activity option for the week was the LEGO Tournament! From towering skyscrapers and luxurious mansions to tanks, ships, and even Beyblade-inspired creations, the possibilities seemed endless. Armed with tubs of LEGO and plenty of imagination, our OSHCies built, competed, and shared their incredible creations with one another.
